

Scorpion Alarm & Security Options

The Scorpion, Sigma, Toad and Sterling range of security systems cover the passenger car and light commercial vehicle security market as well as the heavy goods vehicle sector and incorporates a wide range of products to protect you, your vehicle and their loads.

These systems are widely used with a large selection of manufacturers in the original equipment market as well as in the after-market security industry. All Scorpion products carry up to a 24 Month Warranty.

Sigma - The Sigma S Series is designed to work independently as a full remote control system linked to the vehicle's central door locking, or to interface with the manufacturer's pre-installed remote locking system. All models are manufactured to the highest European

certification standards, including Thatcham approval for the appropriate insurance-approved systems. Car Security with built-in intelligence.

Toad - The latest range of Toad alarm and immobiliser systems continues a tradition of offering the latest insurance approved technology to help protect you and your vehicle.

Sterling - The Sterling range of security systems offers the latest Thatcham & insurance approved products to help protect you and your vehicle. Sterling immobilisers are built to the latest, demanding, European standards using cutting-edge technology to deliver new standards in vehicle security.
